What's New!

Exciting new renovation work is taking shape at the practice. Those visiting soon will see a big difference to the reception area. Although we are only at the half way stage there are more changes to look forward to, including a bigger bathroom!

We are looking forward to changing the access into the surgery area in the summer, allowing us to extend and improve our WC facilities, increase storage and to have beverage facilities installed for all to appreciate.

Although we currently have a lovely shade of plaster on the walls we hope the ongoing work will not cause too much inconvenience to our patients and you'll all appreciate the modernisation we will achieve in the near future.

Summer Special Offer 25% off tooth whitening

Did you know that only dentists, dental therapists, hygienists and dental technicians working to the prescription of a dentist can legally perform tooth whitening.

Anyone else offering whitening such as beauticians will not have the right training and knowledge, they could permanently damage your teeth and gums and can't help you if something goes wrong!

Only £255 usually £345

Offer expires 1st September 2015

Considering an implant?

Dental implants are one way of replacing missing teeth. A titanium screw is planted into the jaw bone to support a replacement tooth. This acts like the root of a natural tooth. Implants can also be used to support fixed bridges or dentures. Some of the many benefits include:

- Giving you a confident smile
- Restored functionality - you can chew and Enjoy a wider range of food.
- No more loose dentures.
- They are strong, safe and reliable
- Preventing further bone loss from missing teeth.

Marco has more than 15 years experience providing implants for his patients and continually attends courses to keep updated with the latest techniques.

Fun Facts

A snail's mouth is no larger than the head of a pin but in fact contains 25,000 teeth!

The average human produces 28,000 litres of saliva in a lifetime. That is enough saliva to fill 2 swimming pools!

Can't floss? Won't Floss?

New in stock..... Phillips Sonicare Air floss Pro

All patients are advised to adopt a good daily hygiene routine, which includes brushing teeth, interdental cleaning and using mouthwash when necessary.

It is essential to reduce the risk of gum disease and decay. You must ensure that you target all areas of the mouth, including those in between your teeth.

If you cannot get to grips with the preferred method of flossing, have you considered the Air floss Pro? Ask in practice for details.

Referrals

We are always pleased to welcome new patients.

Most of our patients come from personal recommendations and we are most grateful to all our regular patients who refer their family and friends to us.

If you know of anyone who would like to join our practice do pass on our details.

Please ask them to mention your name when they register with us so we can thank you for your support.

After putting the finishing touches to our new website, we would love you to take a look.....

We are also now on Facebook, like us to follow our latest news!

Holiday Time!

If you are taking some time away this summer and are a Denplan patient, remember that Denplan Care also provides cover for dental emergency treatment, whether you're in the UK or abroad. Simply give them a call on **0800 401 402** and they will put your mind at rest and help take care of the details.

The practice will also be taking some holiday time on the following dates:

From Thursday 30th July – Reopening on Monday 10th August
From Monday 24th August – Reopening on Tuesday 1st September

Please be assured if you experience any dental emergencies during this time, follow the instructions on **01480 860618** and we will aim to resolve it for you.

Reasons dentists take x-rays

- Look for decay between teeth
- Check for bone loss associated with gum disease
- Check for decay under fillings
- Look for infection at the tip of the root
- Examine the area before procedures

Opening Times

Monday, Tuesday and Thursday 8.30am – 5.00pm
Out of hours, patients experiencing severe difficulty can contact Marco on 07779 662579
